INNOVATION. QUALITY. TRADITION.

The Marvin Group

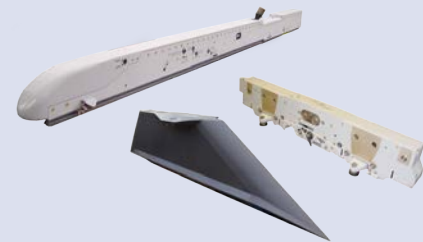

The Marvin Group is a vertically integrated, privately held small business headquartered in Southern California comprised of three business units: Marvin Engineering Co. (MEC), Marvin Test Solutions (MTS), and Marvin Land Systems (MLS).

Marvin Engineering is the flagship company of The Marvin Group and a worldwide leader in Alternate Mission, Auxiliary Aircraft and Role Equipment. We support both current in-service and emerging fixed wing platforms including the A-10, TA/FA-50, F-15, F-16, F/A-18, F-22 and F-35 as well as rotary-wing applications such as UH/MH/SH-60, AH-1, Airbus Tiger, AH-64, MQ-1 Predator, MQ-9 Reaper and MQ-1C Gray Eagle. Ground launch missile systems supported include MML, SLAMRAAM, and NASAMS. Our latest development efforts are focused on innovative stores carriage and release solutions for 5th Generation platforms and beyond.

Marvin Test Solutions has delivered innovative, feature-rich automated test solutions for Military, Aerospace and Manufacturing organizations since 1988. Our proven expertise tackling the demanding requirements of aerospace and military test systems carries through to our work in developing manufacturing applications, quickly creating and delivering test equipment that is modular, high-performance, low power and ultimately reducing maintenance and sustainment costs.

Marvin Land Systems is an OEM of ECUs and APUs for military land and maritime applications. We have a rich history of successfully designing, fabricating and deploying lightweight ECUs, APUs, generators, NBC systems and propulsion cooling fans in addition to modification and overhaul kits for tanks and tracked vehicles.

Armament Equipment
Air-to-Air, Air-to-Ground,
Surface Launch

- Bomb & Ejector Racks
- Missile Rail Launchers
- Multiple Stores Carriage Systems
- Pylons
- MRO/Sustainment
- User/Maintainer Training
- Advanced Technology Development

Multi-Level Test Systems,
Electronic Components /
Assemblies

- Armament Test Sets
- SMS Test Sets
- Flight Line Testers
- O-/I-/Depot-Level Maintenance Testers
- Airborne Electronics
- User/Maintainer Training
- Engineering Services

Ground & Maritime Primary /
Secondary Support Systems

- Environmental Control Units design and production
- Auxiliary Power Units design and production
- Electronics Chillers
- Remote Weapons Stations
- Rigid Wall Equipment Shelters

SOLUTIONS

With over 500,000 square feet in Inglewood and Irvine, California, local presence via authorized distributors and representatives in multiple regions, The Marvin Group provides high tech solutions, products and services to over 30 nations worldwide.

DESIGN AND QUALIFICATION

- Specification Creation
- Performance Engineering
- Producibility Analysis
- Design-to-Cost
- Qualification Testing

MANUFACTURING AND TEST

- Acceptance Test Equipment
- Design Improvement
- Configuration Management
- Continuous Improvement

SUSTAINMENT PACKAGE

- Special Test Equipment
- Spares/LRU Supply Chain
- O-/I-/Depot-Level Test Sets
- Technical Documentation
- Comprehensive Training
